I am Esteban Aspe, 20 years old and I am in my third year of Computer Engineering in the Polytechnic University of Madrid. My focus is to learn everything I can, as well as get to know how the working environment related with my degree is like.

EDUCATION

09/2020-06/2024

COMPUTER ENGINEERING, POLYTECHNIC UNIVERSITY OF MADRID

I have an average mark of 7.25, with my best marks being the programing subjects with up to 9.5. We have been studying Java, C, Matlab, assembly language, SQL and know we are starting with some functional Languages such as Elixir. We have also learned Math, which includes algorithm and problem solving, and complexity understanding.

01/2023-03/2023

FULL STACK OPEN

It's a free course created by Helsinki's University. It's an introduction to modern web development with JavaScript. The main focus is on single-page applications implemented with React and supporting them with RESTful and GraphQL web services implemented with Node.js. It also included a course to connect your web application with MongoDB

APTITUDES

- Fast-Learner
- C (Medium)
- JavaScript (Basic)
- React (Basic)
- B2 English level

- Problem-solving
- Always learning
- Java (Medium)
- SQL (Basic)
- Node.js (Basic)

ACTIVITIES

I have been an exchange student in Finland during one year, what really helped improve my English level as well as for being a more independent person. In the degree, we have learned and resolved many different types of problems, such as a program which compress and decompress text in assembly language, as well as a management from a trash central, which included concurrency problems.
